

Ujwal Shet

System Engineer

ujwalshet6@gmail.com • in/ujwal-shet-118318202 • bengaluru

Summary

I am a proactive Cloud Engineer with 3 years of experience in IT infrastructure, specializing in AWS cloud services, virtualization, and system administration. I have hands-on experience in managing cloud environments, deploying scalable infrastructure, and improving system reliability through automation and best practices. I am passionate about optimizing cloud performance, security, and cost efficiency using AWS services. I am currently seeking an AWS Cloud Engineer role where I can utilize my skills to build, manage, and enhance cloud-based infrastructure.

Skills

AWS (EC2, VPC, IAM, S3, CloudWatch, CloudTrail, RDS, Systems Manager) • Linux Administration • Networking • Server Management • VMware • Cloud Monitoring • Incident Troubleshooting • Security & IAM • Python Scripting • MongoDB • PostgreSQL • User Access Management (UAM) • Vulnerability and Compliance Management • PowerShell Scripting • Active Directory and Services • SSM Automation • Terraform

Experience

Stratigent Technology Services Limited | PTP Company

Bengaluru, Karnataka

Cloud System Analyst (AWS & Linux)

07/2023 - Present

Technology services company specializing in cloud computing and IT infrastructure solutions

- Analyzed user requirements and system issues to recommend improvements and optimize cloud infrastructure performance.
- Troubleshoot and resolved cloud and system-related issues to support users and ensure smooth operations in AWS environments.
- Monitored and maintained system security by identifying vulnerabilities and implementing best practices for access control and infrastructure protection.
- Designed and managed scalable infrastructure using virtualization and AWS cloud services, improving system availability and resource utilization.

Education

Vishwanath Rao Deshpande Institute of Technology

Haliyal, Karnataka

Bachelor of Engineering - CGPA: 8.7

08/2019 - 06/2023

Certifications

[AWS Certified Solutions Architect](#) — Amazon Web Services

[AWS Certified AI Practitioner](#) — Amazon Web Services

[AWS Cloud Practitioner Essentials](#) — Amazon Web Services

[AWS Technical Essentials](#) — Amazon Web Services

[ManageEngine MECPA Application Manager](#) — ManageEngine

[ManageEngine UEMS Patch Manager Plus](#) — ManageEngine

[Logic Monitor Certified Associate](#) — Logic Monitor

[Basics of Networking](#) — Great Learning

Projects

On-Premises Infrastructure Migration to Cloud

- Led the migration of on-premises server infrastructure to a cloud environment, ensuring minimal downtime and seamless transition.
- Performed data transfer, system reconfiguration, and application optimization to ensure compatibility with cloud platforms.
- Improved infrastructure scalability, system performance, and operational efficiency through cloud-based solutions.

Automated Patch Management using AWS Systems Manager

- Implemented automated patch management using AWS Systems Manager (SSM) Patch Manager to maintain security and compliance across EC2 instances.
- Configured patch baselines, maintenance windows, and automated patch deployment to reduce manual intervention.
- Integrated third-party patching for applications and packages, improving system security and ensuring timely updates across the infrastructure.

AWS Serverless EC2 Monitoring with Lambda and SNS

- Designed a serverless monitoring solution to track the health status of EC2 instances using AWS Lambda, CloudWatch, and SNS.
- Implemented automated alerts to notify administrators via Amazon SNS when instances failed health checks or stopped responding.
- Built the solution using serverless architecture, enabling real-time monitoring with zero additional infrastructure cost.

Intelligent Security Surveillance Door Lock System

- Designed and implemented an intelligent door lock surveillance system integrating biometric authentication and motion detection, reducing unauthorized access.
- Developed real-time human detection and identity recognition using Python, computer vision, and machine learning techniques.
- Integrated facial recognition and motion detection frameworks to build an automated monitoring system for enhanced security and surveillance.

Internships

Tech Fortune Technologies

AWS Cloud Computing

- Successfully completed a 60-day internship program under the mentorship of Mallari Kulkarni, Founder & CEO of Tech Fortune Technology.
- During this period, I gained in-depth, hands-on experience with core AWS Cloud services.
- Amazon EC2 – Provisioning, configuring, and managing virtual servers.
- IAM (Identity and Access Management) – Implementing secure access controls and user permissions.
- Amazon VPC – Designing and managing isolated cloud networks.
- Amazon S3 – Managing scalable object storage solutions.
- Basic AWS Infrastructure Services – Understanding foundational cloud architecture and deployment strategies, this internship significantly strengthened my cloud computing skills and provided a solid foundation for building scalable and secure cloud-based solutions.
